

## Determine Your Ring Size

### Quick Tips for getting a correct ring size

1. Follow the instructions to obtain an accurate measurements, as ring measurements are very precise
2. Ensure that Page Scaling is set to "None" on your print dialog box
3. Ensure that the bar on the left is exactly 30mm long.

### Measure Current Ring

1. Select a ring that properly fits the intended finger.  
Engagement and wedding rings are traditionally worn on the ring finger on the left hand in the United States
2. Place the ring over the circles to the right. Matching the inside edge of the ring to the circle nearest in size. This measurement refers to the inside diameter of the ring.
3. If the ring falls between two sizes, order the larger size.

### Measure Your Finger

1. Your ring should fit your finger comfortably; snug enough so that it will not fall off, but loose enough to slide over your knuckle
2. Finger size changes depending on the time of the day and the weather.  
For better results:
  - Measure your finger at the end of the day and when your fingers are warm. (Fingers are smaller in the early morning and when cold.)
  - Measure your finger size 3 to 4 times to eliminate an erroneous reading
3. Avoid using string or paper to measure ring size as these materials can stretch or twist, yielding an inaccurate measurement.
